

MEXICO'S NATURAL WONDERS

Mexico has a wealth of ecosystems and wildlife species, with striking landscapes and coastlines that lend themselves to adventures great and small. The country is one of just 17 nations designated as mega-diverse destinations recognized for ecological complexity by Conservation International. Whether it's ziplining through the lush canopies of the Sierra Madre or kayaking alongside pods of dolphins, there's never a dull moment south of the border.

Choosing Mexico Online Community

This free, curated and crowd-sourced content helps you explore the realities (truths and myths) about overseas living in Mexico. Topics, timely news, maps, destination content, insights and a path toward Mexico for living peace of mind. It's all here. Expand your living horizons.
